

including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(b) of the act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan;

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 7th day of November, 1996.

Ivan Strasfeld

*Director of Exemption Determinations,
Pension and Welfare Benefits Administration,
Department of Labor.*

BILLING CODE 7545-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-245, 50-336, and 50-423; License Nos. DPR-21, DPR-65, and NPF-49]

Northeast Nuclear Energy Company (Millstone Nuclear Power Station Units 1, 2 and 3); Order Requiring Independent, Third-Party Oversight of Northeast Nuclear Energy Company's Implementation of Resolution of Millstone Station Employees' Safety Concerns

I

Northeast Nuclear Energy Company (Licensee) is the holder of Facility Operating License Nos. DPR-21, DPR-65, and NPF-49 issued by the Nuclear Regulatory Commission (NRC or Commission) pursuant to Title 10 of the Code of Federal Regulations (10 CFR) Part 50 on October 31, 1986,¹ September 26, 1975, and January 31, 1986, respectively. The licenses authorize the operation of Millstone Units 1, 2 and 3 in accordance with conditions specified therein. All three facilities are located on the Licensee's site in Waterford, Connecticut.

II

Over the past several years, the Licensee's management has failed to ensure compliance with regulatory requirements. In an attempt to address this compliance problem, the NRC issued an Order on August 14, 1996 establishing independent, third-party oversight of corrective actions for design and plant operation deficiencies. The August 14, 1996 Order, directing the implementation of an Independent Corrective Action Verification Program (ICAVP) for the Millstone facilities, summarizes the Licensee's failures to meet Criterion XVI of Appendix B to 10 CFR Part 50 and other NRC requirements. The August 14, 1996 Order also outlines what the NRC found to be ineffective implementation of the Licensee's oversight programs, including its NRC-approved quality assurance (QA) program. The purpose of the ICAVP is to provide independent verification, for selected systems, that the Licensee's own Configuration Management Plan (CMP) has identified and resolved existing problems, documented and utilized licensing and design bases, and established programs,

¹ Millstone Unit 1 was issued its provisional operating license on October 7, 1970, and commenced operation on March 1, 1971. This unit received a full term operating license on October 31, 1986.
